## PF FRAMES

### COMPOSITE DOOR FRAMES

#### Composite door frames for your home

Our PF Frames are full-length composite exterior door frames built to create a long lasting, rot-free entryway for your home. Together with our fiberglass doors, PF Frames create a weatherproof entry system to protect against the elements.

#### Why PF Frames are the best frames for fiberglass entry doors

Our rigid PF (poly-fiber) door frames provide you with a reliable and durable alternative to wooden door frames.

Traditional wooden frames deteriorate over time, leaving entryways vulnerable to the elements. PF Frames combine the strength and convenience of wooden door frames, but with enhanced properties such as twice the screw-holding power as wood.

PF Frames are constructed with full-length PVC composite material. Our composite frames will never absorb moisture, rot, splinter, or rust like wood and metal doors. In other words: PF Frames are built to last.

#### Composite door frames look great and last

Our innovative PF Frames are machined like wood, look and feel like wood, and can be painted or stained just like wood frames. The noticeable difference comes down to the strength and durability.

The closed cellular structure of our composite frames ensures that the molding will not absorb moisture, and that the frame will resist splitting, rotting and insect damage. While other companies may use a few inches of composite material jointed to wood at the bottom of their frames, we are proud to offer 100% full-length composite frames.

# HYDROSHIELD TECHNOLOGY

HydroShield Technology™ provides you with the complete moisture and humidity protection essential for your exterior doors. While other entryways are affected over time by wear, rot and mildew, our unique barrier system protects against water infiltration and is durable against the elements.

HydroShield Technology™ is formed by utilizing our fiberglass exterior doors and PF frames. Read below to see just how these components protect your home's entryway from moisture and water damage.

## Fiberglass Doors

Our fiberglass entry doors with exclusive HydroShield Technology™ feature fiberglass reinforced door skins, full-length composite stiles, and composite top & bottom rails to prevent water infiltration on all six sides.

## FULL LENGTH COMPOSITE TOP AND BOTTOM RAILS

Additional non-porous protection keeps water from seeping into the door and helps prevent the build up of mold or mildew.

## FIBERGLASS REINFORCED SKIN

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. Our doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

## FULL LENGTH COMPOSITE STILES

All of our fiberglass entry doors feature full length composite stiles to prevent water infiltration into the door and ensures our door will never warp, rot, or rust.

# PRODUCT WARRANTY DURATION

PRODUCT TYPE	DESCRIPTION	RESIDENTIAL	COMMERCIAL & MULTIRESIDENTIAL
FIBERGLASS DOOR	TEXTURED	LIMITED LIFETIME	3 YEARS

# Fiberglass smooth skin

These doors are scratch-resistant! Patented, pre-pigmented white skin infuses the door white through and through. Can be painted or faux finished to coordinate with your home decor.

All door systems are sold unfinished.  
Natural color of smooth doors are white.

## Glazed Series

DRS40 651

DRS40 684

DRG49 607

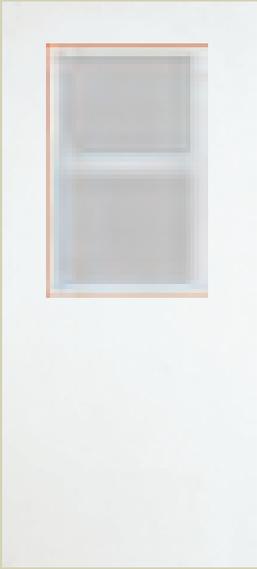

Glazed doors are available in different glass styles:

- Clear (LowE required on full glass to meet energy efficiency requirements)
- Obscured - This is your typical obscure glass that has been around for many decades
- White interlayer - This glass unit has a white film between the glass. It's look is best described as placing a thin sheet of paper on glass and looking through it at a light source. Its the most modern form of privacy glass available.

## *Ventilating Doors*

This product by DLP Industries is an operational window insert/door combo. When the window is open, fresh air is introduced into the home, eliminating the need for a screen door.

### **Sizes & Glass Options**

The Windsert Door System is available in many different glass options. See chart below for availability.

- Perfect for beach side residential dwellings
- Excellent for condominium doors, patio doors, cabana bath doors, and side garage doors
- Replaces old jalousie style doors
- Comes with standard screen
- Manufactured in Florida

## *Optional Security Screen*

- Offers insect control, and hurricane protection
- Premium grade High Tensile 304 Stainless Security mesh
- Impact Resistant
- Allows ventilation without compromising security

# Door Hardware

Due to the numerous styles and finishes available for your new impact doors (and in order to keep costs down for our customers), we do not provide hardware. We prefer that you make your own hardware selection and refer you to the following website:

<https://www.handlesets.com/door-entry-set/c3891>

This is by far the best prices we have found for exterior door hardware. Keep in mind that we only use Kwikset or Schlage products since they have been tested with our doors and are verified through testing as being impact resistant.

Once your hardware selection has been made, we will make the purchase (to assure proper fit) and add the total cost including taxes and shipping to your final invoice.

Color chart for representation only.

Hinges are an integral part of the **BHI Door** System. We incorporate the best-in-class hinge components.

- Each hinge leaf and pin is nickel-plated to protect from corrosion
- An epoxy-resin coating is applied for long-lasting durability
- Prior to final assembly, the pins are lubricated to reduce friction

2 YEAR FINISH WARRANTY

# Optional Multi-Point Lock Hardware

## THREE TIMES MORE SECURE

Trilennium features three full deadbolt locks for ultimate strength and security. No hooks or catches that require unrealistic alignment and result in frequent service calls. Among the strongest and most secure in the industry, Trilennium Multi-Point Locking Systems exceed Grade 30—or 300 ft-lbs x 2 of impact, per ASTM E 2395.

## A MULTI-POINT LOCKING WITH STRENGTH

A solid, one piece I-beam runs the full length of the lock. That not only increases the strength and precision of the lock, but when Trilennium is installed it actually strengthens the door edge and prevents door warping over the life of the panel. Workmanship like no other multi-point lock. You can see and feel the difference.

## A MULTI-POINT LOCKING SYSTEM THAT IS INTUITIVE

Premium hardware is available for any door system in styles to match every decor. Unlike European-style systems, Trilennium operates intuitively; a single quarter turn of the thumb turn activates all three dead bolts smoothly. Plus the assurance of a panic release feature. Panic release opens the lock with a single downward turn of the interior lever. Benefits that a home owner will truly appreciate.
